

Call for Papers

SAT & SPACE COMMUNICATIONS SYMPOSIUM

SYMPOSIUM CO-CHAIRS

Mianxiong Dong, Muroran Institute of Technology, Japan, mx.dong@csse.muroran-it.ac.jp

He Li, Muroran Institute of Technology, Japan, heli@mmm.muroran-it.ac.jp

SCOPE AND MOTIVATION

The recent advances in satellite communication technology have witnessed an unprecedented increase in services possibly distributed according to an anywhere-anytime paradigm. In this regard, the appearance of new standards, and the simultaneous integration with terrestrial infrastructure, has introduced new technical challenges to be faced by the scientific community. In particular, the integration of satellites with the future terrestrial networks has further motivated the study of new networking and communication paradigms and attracted significant interest from both academic and industrial communities.

The SAT & Space Communications Symposium solicits original and unpublished work not currently under review by any other conference or journal. The focus of this track is on exploring and discussing new technical breakthroughs and applications focusing on all aspects of satellite and space communications.

TOPICS OF INTEREST

To ensure complete coverage of the advances in this field, the SAT & Space Communications Symposium solicits original contributions in, but not limited to, the following topical areas:

- Satellite and Space Communications and Networking
- Near-earth Satellite Communications
- Interplanetary Communications
- Nano-satellites Communications
- Satellite-terrestrial Integrated Networks
- Cognitive Satellite Networks
- MIMO Satellite Communications
- Antennas for Satellite Communications
- Channel Models for Satellite Communications
- Coding, Modulation and Synchronization Schemes for Satellite Communications
- Signal Detection and Estimation for Satellite Communications
- Statistical and Adaptive Signal Processing for Satellite Systems
- Transport Protocol Performance over Satellite
- Security, Privacy, and Trust in Satellite Networks
- Radio Resource Management in Satellite Networks
- Software-defined Networking (SDN) and Network Function Virtualization (NFV) in Satellite Systems
- Delay Tolerant Networking for Satellite Networks
- Qos and Performance for Satellite Networks
- On-Board Switching and Processing Technologies
- Interference and Fade Mitigation Techniques over Satellite Channels
- Mega-Constellations Design
- M2M over Satellite Applications
- New Standard in Navigation Systems: Galileo, GPS, SBAS (EGNOS, WAAS...), GBAS.
- Emerging Standards: DVB-Sx, DVB-SH, DVB-RCS2, IP Over Satellite
- Satellite-based Disaster Recovery
- Satellite-based Remote E-Health
- Satellite-based Solutions for Aeronautical Applications
- Satellite Communications for Maritime Applications, E.G., AIS
- Next-Generation Channel Coding for Deep-Space Communications
- Telemetry/Telecommand Space Protocol Evolutions
- Architecture and Key Techniques for Space Information Networks
- Space Optical Wireless Communications
- Internet of Remote Things

IMPORTANT DATES

Paper Submission: **21 August 2022 (firm)**

Notification: Rolling basis until 31 August 2022

Camera Ready and Registration: 7 September 2022

HOW TO SUBMIT A PAPER

All papers for technical symposia should be submitted via [EDAS](#).

Full instructions on how to submit papers are provided on the IEEE FNWF 2022: <https://fnwf.ieee.org/>
